

Talk: Non-hierarchical predictive processing of acoustic and semantic content in speech

Chang Liu

Slide Session B: Fine-Scale Dynamics of Speech Perception

Wednesday, September 30, 3:30 - 4:30 pm, Amphitheatre D

Poster A73: Emergence of lexical stress encoding in the human temporal cortex

Ilina Bhaya-Grossman

Wednesday 11:00 am - 1:00 pm

Poster A75: Social pragmatic communication difficulties predict altered pitch use and serial dependence in prosodic stress judgments

Peter Bang

Wednesday 11:00 am - 1:00 pm

Poster B97: Rapid neural analysis of linguistic stress and meter in continuous speech

Camila Zugarramurdi

Wednesday 4.30 pm – 6.30 pm

Poster C89: Spectro-temporal continuity determines perceptual timing precision in complex sound sequences

Charlotte Mock

Thursday 10:45 am - 12:45 pm

Poster E96: Word meaning, not co-occurrence statistics, is essential for predictive language processing

Andrey Zyryanov

Friday 11am – 1pm

Poster F98: Rate-normalized Encoding of Vowel Duration during Speech Processing

Mara Wolter

Friday 2:45 - 4:45 pm
